The quality of output video is often described as 'original high quality' This gives the credit to MacX' High Quality Engine, which can guarantee the 1:1 untouched quality during the video downloading procedure, even video downloads at batch.. Of course, when it comes to capture 4K or 8K Ultra HD video, the time consumption would be longer, cuz the video file size is usually 4 times as large as 1080p.. They are free and easy to use Feel free to opt for the best one from the nominees.. Once the video source you find and open on your browser, all you have to do is to select the video format, codec, resolution and file size after the URL auto detect is finished.. It would be even better if it includes the video conversion feature As for those who need to convert YouTube video to MP4, H264, HEVC or other formats and mobile devices, MacX Video Converter Pro cuts the buck..
